## NEVERFURLS

With NeverFurl® you can fly your flag all day long, every day of the year, and the wind will never wrap your flag around the flagpole. The NeverFurl® kit is easy to install and comes complete with everything needed including instructions and detailed drawings. No additional tools are required.

The design of the NeverFurl® device allows each rotator to work independently with the wind by moving up and down **and** rotating around the pole thereby eliminating flag wrapping. Works with all flag sizes regardless of changes in wind speed or wind direction.
